# PORTFOLIO(THE WEBSITE):

A screenshot of a dark-themed portfolio website. At the top right, there's a profile picture of a man with the name "Ayush" and a stylized "A" logo. On the left, there's a bio section with the text: "Hi, I'am Ayush – A Full Stack Developer !!", "A Good Observer, A Better Learner ★", and a brief description: "I design and develop responsive interfaces, micro-interactions, and IoT projects. I blend design and code to create striking, usable products." Below this are two buttons: "My Projects" and "Hire Now". To the right of the bio is a circular portrait of the developer. At the bottom left, there's a "About Me" section with a bio: "I am a B.Tech student and a front-end developer(Back-end is still in progress.) who loves mixing visual design with clean code. My focus is on interactive UI, animations, and small IoT projects — especially using ESP8266. I build websites with performance and delightful micro-interactions." To the right of the bio is a "Technical Skills" section with buttons for HTML, CSS, Python, MySQL, JavaScript, UI/UX, Arduino, and Git.

A screenshot of the same portfolio website, but with a different header navigation bar. The header now includes "My Projects" and "Hire Now" buttons. The rest of the page content is identical to the first screenshot, including the "About Me" section, "Technical Skills" section, and the "My Projects" section at the bottom featuring three projects: "Smart Door Lock", "Daily Wage Worker Platform (UI)", and "Wanderra - Travel Website".

My Portfolio !!
